

Chew my ANTLERS

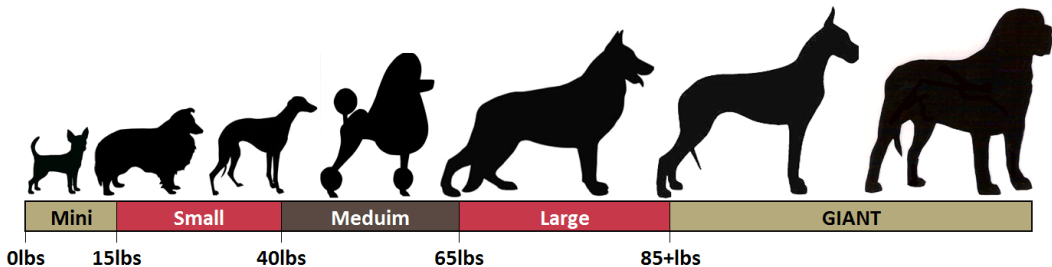

Nature's Best Treat for Man's Best Friend

- Safe** Antlers don't splinter, peel, or chip like typical bones do. All sharp edges, corners, and points are removed.
- Tasty** Unique flavor that dogs LOVE, especially the soft, spongy center.
- Clean** Antlers will help clean and whiten your dog's teeth, without leaving a nasty mess behind.
- Durable** Antlers last longer than other chews, wearing slowly over time.
- Nutritious** Natural source of Calcium, Phosphorus, Iron, Magnesium, Potassium, Glucosamine, Collagen, and other nutrients.
- 100% Natural** Antlers are shed and regrown naturally every year (no animals killed or harmed). NO chemicals or substances added, and antlers are naturally hypo-allergenic... but they may become habit-forming ☺

Recommended Sizes

-  Every antler is unique, and so is every antler chew. Color, shape, and size may vary.
-  Antler chews must be appropriately sized to prevent possible swallowing or choking.
When in doubt, go a size bigger... it will last longer!
-  Please ensure you have an antler for every dog, and one big enough for your largest dog.
-  **Antler chews wear slowly and get smaller over time, so please replace with a new one when it gets too small. Enjoy!**
